SOURCE: 1970 U. S. Census of Housing

The overcrowded index is the percentage of occupied housing units with 1.01 or more persons per room. The black overcrowded index is the percentage of black occupied housing units with 1.01 or more persons per room. Both of the overcrowded indexes are high in the black majority enumeration districts as compared with the overcrowded index for the total city. Incomplete plumbing is the percentage of "occupied housing units which lack complete plumbing." The incomplete plumbing is also high in the districts which have a black majority population as compared to the white majority areas. The incomplete plumbing average for the City of Kinston is 12.8%, however, in enumeration district 31 the average is 73.4% or 213.7 housing units.
